5-6 Pivot turn right by stepping forward left
7-8 Turn ½ right and step forward right

1-8 Look left-right-left point to left, turn ¼ right and step side left while looking sharply left, right, left and point with both hands to left

This really shouldn't be counted. Listen to accent in music. It is obvious

SPIDER FINGERS OR BODY ROLL

1-8 With hands and arms extended in front of you, elbows bent and palms down to the left diagonal, wiggle fingers as you bring both hands from left to right. If this seems to stupid (which it is meant to be), you can bring the arms in to you and do a body roll. I personally have an aversion to spiders, so i work on my phobia by leaving my left arm straight out to my left, and pretend my right hand is a spider that quickly runs up my left arm and down my body which does a body roll:) (me, not the spider)

TAG 1

Walk forward in a circle starting with left for 8 steps coming back to where you started facing 12:00. The walks are slow but counted fast as 2 beat walks so it is 16 counts

TAG 2

The music slows down so instead of doing spider fingers just point to left and slow motion

1-16 Move your hands back to center. Then this is just a step tap with a clap that is turning slowly for 16 counts. In slow counts turn ¼ left and step forward left, turn ¼ left tap right together and clap, step side right, tap left basically where it was and clap. Turn ¼ left and step forward left, turn ¼ left tap right together, step side right, tap left basically where it was and clap. You should be back to 12:00 again so do the same moves again another 8 count

Sequence: Intro, A, TAG 1, BB, AB, AAAA, B, TAG 2, A, ENDING

ENDING

All move to tight bunch center for end!

During the 4 A's (Charleston section) in the middle - it is so easy that I have each set starting a new wall. 12:00, 3:00,6:00, 9:00... the easy place to turn ¼ right is on the kick up down. When you are kicking on a

diagonal just go ahead and make it more of a turn and finish the move facing the new wall
Don't let all this stuff on the step sheet worry you... it is a really easy dance and while it looks like a lot of counts it really isn't. The count is fast so it flies by
