Now back at original wall

Next 4 counts complete full turn to left in circle pattern to back corner

1-3 Stepping back on left start a turn left that will end up being 45 degrees short of a full turn, completing turn right-left on the spot

4 Cross right over left
5-6 Pivot ½ turn right on right as you sweep left toe full circle to the right (2 counts)

1-6 Repeat last 6 counts turning another ½ turn to right

1-3 Step forward on left, then turning ¼ turn to left step right-left on spot
4-6 Step back on right, then left-right on spot

1-6 Repeat last 6 counts turning another ¼ turn to left

REPEAT

Music stops briefly during fifth (final) sequence. just dance through it. At end of this fifth final sequence, music slows down. finish as follows (Do not slow down the steps even though music slows down)

1-3 Turning ½ turn to left step forward on left, then right-left on spot
4-6 Step back on right, then left-right on spot
7-end Large step back on left then very slowly drag right toe back next to left

This dance should be a very gentle flowing style of waltz

When doing dance to back walls beats 13-14-15 of dance can complete forward full turn left. I suggest that this extra full turn not be done to front walls. Lyrics on walls 3 & 5 are "we'll float on the clouds" and you can

raise both hands forward and up as if you are floating (but only if you want to have a bit of fun).
