I believe soul line dances are usually learned by watching people dance it and memorizing the steps and how they fit the music, making strong musical muscle memories. This dance, fortunately, also lends itself to being counted and written into a step sheet for other learning preferences. The dance is based on Chicago Two Step which when doing the couple dance is counted 1,2, 3,4,5,6 7 8. The counts in this step sheet are based on the rhythm of the music. The dance starts 32 counts in.
