- 29-32 Step to left, cross right in front of left, step to left, stomp right next to left

REPEAT

During counts 17-32, you will be covering the 4 sides of an imaginary square drawn on the floor. The dancer should end up in the same location as they started this pattern (and facing a new wall).

This dance can be done with lines in a contra (face to face) style. The dancers will box around the opposing dancer for counts 17-32. The lines must be close together for this to occur. (it will also make this dance much more difficult!)
