### Styling Notes

- 17-20 Make the step forward quite long, and step slightly to the side of the direction of travel

### About 1:30, 11:30. Add a hip bump to the weighted side on the toe steps

- 23-24 Bump the right hip to the back (relative to direction of travel) when making the quarter turn right. Stomp the left foot to the start position keeping most of the weight on the right, bumping the hips to the center position ready for the hip bumps to the left.
