Dancers may be tempted to execute a "sailor step" as opposed to the "behind side-rock". Depending on which song you choose to dance to and based on the tempo, you may find yourself falling into a sailor step. Be careful of the transition from dance end to beginning. The dance starts with a rock back on right, and ends with a "heel jack"

For the transition between the end and beginning. Keep the "heel jack tight" and body centered (no leaning back) the movement should be more in the hips
