Arm styling: The following should be executed in a smooth, continuous motion; arms will mimic footwork. On 5, place right arm vertically in front of you, bent at elbow with forearm/fist facing you at right eye level; grasp right wrist with left hand (left palm on back side of right wrist). On 6, keeping arms in this position, pull them down slightly, still grasping, so fisted right hand is now in front of right chest. On 7, left hand pulls right arm over (like a lever) to the left into a horizontal position. On 8, release wrist and swing arms down in a counterclockwise motion until both are angled down to the right, pointing at the floor with fingers spread.
